EDUCATION

University of Southern California, Marshall School of Business Los Angeles, CA
Bachelor of Science, Business Administration | Emphasis in Business Analytics May 2027
Relevant Coursework: Product Management, Operations, Applied Business Statistics, Business Analytics, Python Programming

AI PRODUCT AND PROJECT EXPERIENCE

&nourished | Los Angeles, CA Jan 2026 - Present
Growth Product Manager and Software Engineer

- Manage product and growth initiatives for a grocery-delivery startup, translating business needs and customer insights into scoped software deliverables.
- Coordinate with growth and engineering stakeholders to prioritize the roadmap, clarify requirements, and deliver iterative improvements in a fast-paced startup environment.

Launch AI | Los Angeles, CA Sep 2025 - Feb 2026
Product Manager

- Led a five-person engineering team building an AI productivity product; coordinated weekly sprints, tracked milestones, and managed priorities and technical tradeoffs.
- Analyzed 15+ user interviews and defined six features, translating workflow needs into requirements and roadmap decisions for a product serving 200+ USC students weekly.

HappyHopper | New York, NY Jun 2025 - Aug 2025
Growth Product Manager Intern

- Analyzed 200+ feedback items, prioritized product improvements, and coordinated resolution of 20+ reported issues, contributing to a 25% increase in onboarding completion.
- Tracked user and growth metrics for a consumer app with approximately 30,000 monthly active users and 3,000 downloads, translating results into business recommendations.

Cloud Business Technology Group | Los Angeles, CA Aug 2025 - Dec 2025
Technical Consultant

- Analyzed engagement and performance metrics for the Crypto.com Arena VIP tour and developed five client-facing recommendations and a long-term project roadmap.
- Evaluated project data and presented targeted engagement concepts associated with a 25% increase in social sharing to client stakeholders.

The Daily Trojan | Los Angeles, CA Aug 2025 - Jun 2026
Software Engineer

- Built front-end features with HTML/CSS and React Native for a digital publication serving approximately 30,000 readers, collaborating across technical and nontechnical teams.
- Analyzed 10+ beta-testing sessions, documented issues, and prioritized 12 critical bugs to improve launch readiness and delivery quality.

PRODUCT PROJECT

Mintly | *Independent iOS App Development* May 2025
• Built and launched a Swift/SwiftUI personal finance app with budgeting, transaction-history, and data-visualization features, reaching 800+ users across five countries.
